Objective

As an identity governance professional, I have had extensive training and hands-on experience with industry leading tools like Identity Security Cloud (ISC) and SecurEnds. I am passionate about identity and access management. It is my firm belief that everything in the world of information technology begins and ends with identity. Please take a moment to review my [LinkedIn](#) profile and my [website](#) for more detailed information. I look forward to having the opportunity to work with you and your team. Thank you for your consideration.

Skills

- Identity Governance Administration (IGA)
- Role-Based Access Control (RBAC)
- The writing of repeatable technical procedures
- The ability to establish and scale an identity governance program
- Training, leading, and mentoring a team
- Lifecycle State Management
- Certification Campaigns
- ITSM Management

Experience

AVP Identity Access Manager | TowneBank | Suffolk, VA

Hi my name is Derek Stuart and I am thrilled to be an Identity Governance professional with lots of skills and knowledge to offer. I specialize in industry leading tools like SailPoint's Identity Security Cloud (ISC). Areas I have experience in are Lifecycle Management, RBAC, access request management, and Sources onboarding and management.

2018-current

Information Security Analyst | TowneBank | Suffolk, VA

As lead analyst over the Identity Governance Administration (IGA) program my primary goal is to ensure that the program is as close to perfect as possible, ensuring audit readiness, and maintaining the high level of security expected of us by TowneBank's auditors and members. In pursuit of that goal my duties include, but are not limited to, establishing and documenting technically sound and repeatable processes, ensuring procedures remain accurate and up-to-date, implementing and operating industry leading tools like SailPoint's IdentityNow, managing the team assisting with the program, and staying on top of and anticipating industry trends and best-practices. I have established a significant number of monthly, quarterly, and annual UARs in pursuit of the goal of security and compliance to our internal and external auditors (primarily SOX auditors). Post audit, I also have the responsibility of ensuring that potential security gaps are closed in the pursuit of perfection and continuous improvement.
